The Aqua Technics Pools Story

The purchase of your very own swimming pool is an exciting time! A cool-off in summer, recreation for the kids and poolside barbecues have infinite appeal, yet with so many companies to choose from, how can you be sure you are getting the very best pool for your investment?

LOOK NO FURTHER

Aqua Technics Pools has been manufacturing award-winning fibreglass pools since 1976. Right from day one, we knew that if we wanted to be the leading swimming pool manufacturer in Australia, we also had to lead the way with product development and technology. So we began burning the midnight oil researching new manufacturing methods and materials.

AND WE HAVE BEEN EVER SINCE

That's why Aqua Technics Pools has the best range of technologically advanced, award-winning swimming pools in Australia. You can rest assured your pool has been built to Australian Standard 1838.2021 under license number BMP 520101, has Graphene Nano-Technology for exceptional strength, includes an Extended Lifetime Structural Warranty and has award-winning Pool ColourGuard® protection, with brilliant colour and superior fade resistance.

We stand behind our pools so you can take the plunge with confidence, knowing that you have invested in the very best swimming pool available - a pool built stronger to last longer from the team at Aqua Technics Pools.

WHAT SETS US APART from the rest

GRAPHENE TECHNOLOGY

Revolutionary process infusing graphene nano technology into every Aqua Technics pool. Built like no other, a Graphene Nano-Tech pool is our strongest pool ever.

FADE RESISTANT

Aqua Technics pools have patented Pool ColourGuard® surface technology, which resists the effects of UV rays and chemicals, offering superior fade-resistant protection.

QUALITY ASSURED

Certified to build to AS/NZS 1838 under license BMP 520101. We are measured and tested by an authorised, independent auditor. Anyone can say they build to the Standard. For your peace of mind always ask for a license number. We also comply to the AS/NZS ISO 9001 Quality Management System.

ANTI-MICROBIAL PROTECTION

Microtech Anti-Microbial Pool Protection prevents surface algae growth, making it exceptionally hygienic and safer for your family. It's 100% safe and gentle on the human body.

PRECISION MOULDS

New designs are built to exacting tolerances. The edge beams are true, the shapes geometrically perfect and the surface finish is without peer.

SUPERIOR STRENGTH

Full sized structural ribs, fully supported steps and bench seating and a wider edge beam mean the strength is built into the pool. New high strength fibreglass produces a stronger, stiffer pool - up to 20% stronger.

SUPERIOR MATERIALS

All pools are manufactured using high performance, corrosion resistant, eco-friendly fibreglass with improved strength and stiffness. Our onsite gelcoat manufacturing facility means daily batching of materials for a better product. Only specialty materials are used - no general purpose products.

Purpose Built Manufacturing Facility

Our world-class production facility has been purpose-built for the manufacture of fibreglass swimming pools. Here we can build a technologically superior product of the highest quality.

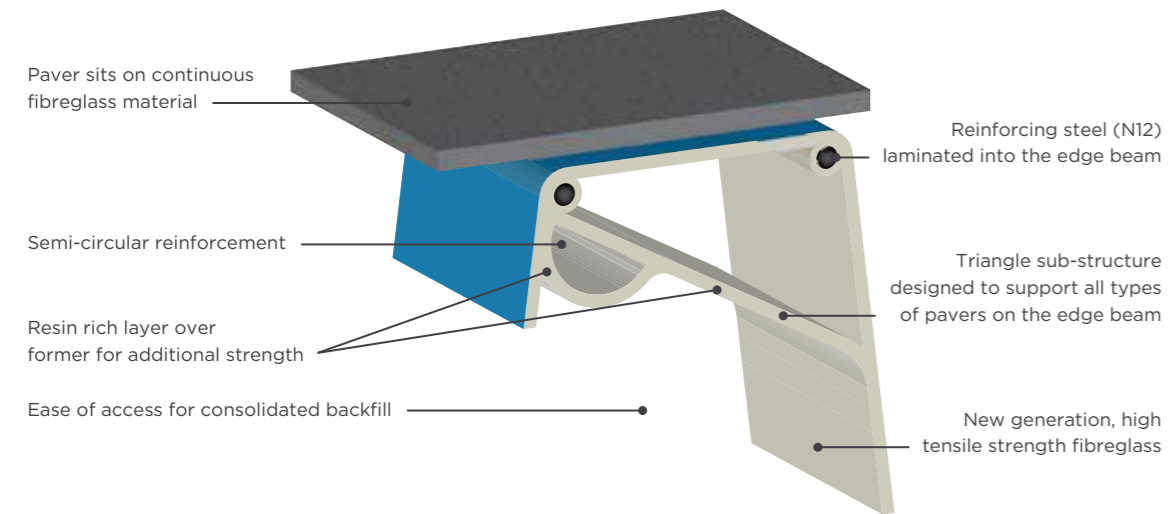

Each of our pools is manufactured in accordance with a Quality Management System as per the requirements of International Standard ISO 9001 and supplied to comply with AS/NZS 1838:2021 under license number BMP 520101. Obtaining this accreditation means we are measured and tested by an authorised, independent auditor and is not easily achieved. Any pool builder can say they build to, or better than, the Australian Standard. For your peace of mind, always ask for a license number.

The strength of our pools is backed by our extended warranties, which go above those standard in the SPASA contract.

OUR PROMISE TO YOU, THERE SIMPLY IS NO BETTER SWIMMING POOL.

Why we build pools with 200mm edge beams

The design of the 200mm edge beam means that the strength is engineered into the pool. This means there is no need for secondary engineering works like a bond beam, however by still adding it we are giving you a pool with exceptional strength that can withstand installations in different soil types. No other pool company can offer you this level of strength.

Built Stronger to Last **LONGER**

Along with our state-of-the-art, purpose built manufacturing facility, we can proudly boast to having our own in-house raw materials production division. This allows us to freshly batch our raw materials on a daily basis, which is extremely important in order to produce a superior quality product.

We have been building fibreglass pools for over 46 years so you can trust we have the knowledge and expertise to build the best swimming pool available today. As leaders in pool technology and development, we ensure that every Aqua Technics pool is superior in every way.

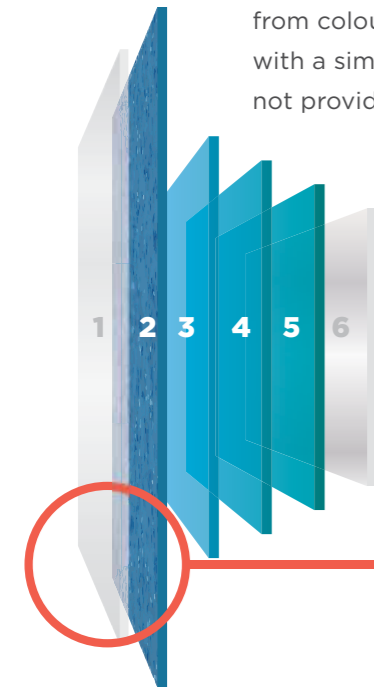

We have been a family owned and operated company since we first began. Many happy memories are created in your backyard pool so it's only natural that a successful swimming pool company should be a family business. We pride ourselves on having the best range of designs, colours and surface finishes. Whether you are looking for a design for fun, relaxation, exercise or all three, we have the perfect pool for you.

The only patented Pool ColourGuard® technology

Exclusive to Aqua Technics, Pool ColourGuard® is the only patented dual surface protection system for fibreglass pools world-wide. The clear layer protects the colour layer and acts like sunscreen for your pool, protecting it from colour loss and weathering. Pools with a simple one coat application do not provide protection for the colour.

We dare you to compare the benefits:

- Resists the effects of UV rays and chemicals
- Pool colour that will look better and last longer than any other
- High gloss finish never before seen on swimming pools
- The only pool surface protection system with a Product Excellence Award

Every Layer Matters

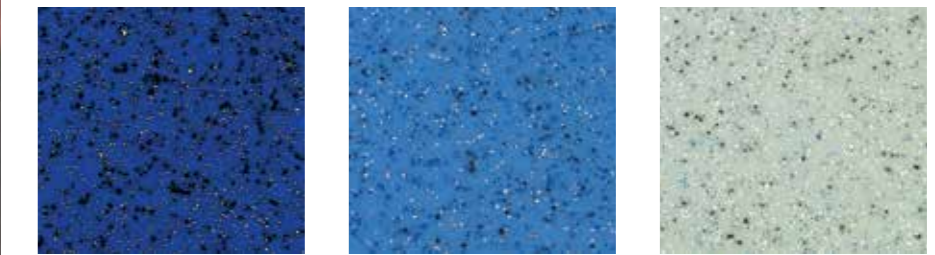

- 1** Patented Clear Resin - chemically resistant, like sunscreen for your pool
- 2** Patented Colour Layer - colours that last longer and act as a corrosion barrier to prevent osmosis
- 3** First Structural Layer and Second Chemical Resistant Layer - double protection
- 4** Second Structural Laminate with unique materials that increase the strength of the laminate
- 5** Third Structural and Reinforced Formers - for increased strength and stiffness
- 6** Exterior Waterproof Membrane and the final layer

Revolutionary, patented dual coat process - two layers a merged to provide extraordinary protection.

Beware of imitations. Only genuine Pool ColourGuard® can offer you these benefits. Lew Beale, Inventor

Ground-breaking Graphene Nano-Tech

Innovative technology in fibreglass pools

Graphene Nano-Tech is a revolutionary process infusing graphene nano technology in every Aqua Technics pool. Over 3 years of research and development has been carried out to incorporate graphene into the structure of our pools, creating a totally new patent-pending construction process that is the next generation of fibreglass pool technology.

30% STRONGER

- Graphene is over 200 times stronger than steel and stronger than titanium, giving you our strongest pool ever
- Increased strength and rigidity of the pool's structure
- Higher impact and flexural strength

30% LIGHTER

- Graphene is surprisingly light, giving our pools exceptional strength without added weight
- Our new technology reduces weight while improving rigidity and flexural strength
- Pools are stronger without being heavier
- Lighter for transport and crane lifts

HIGHER RESISTANCE

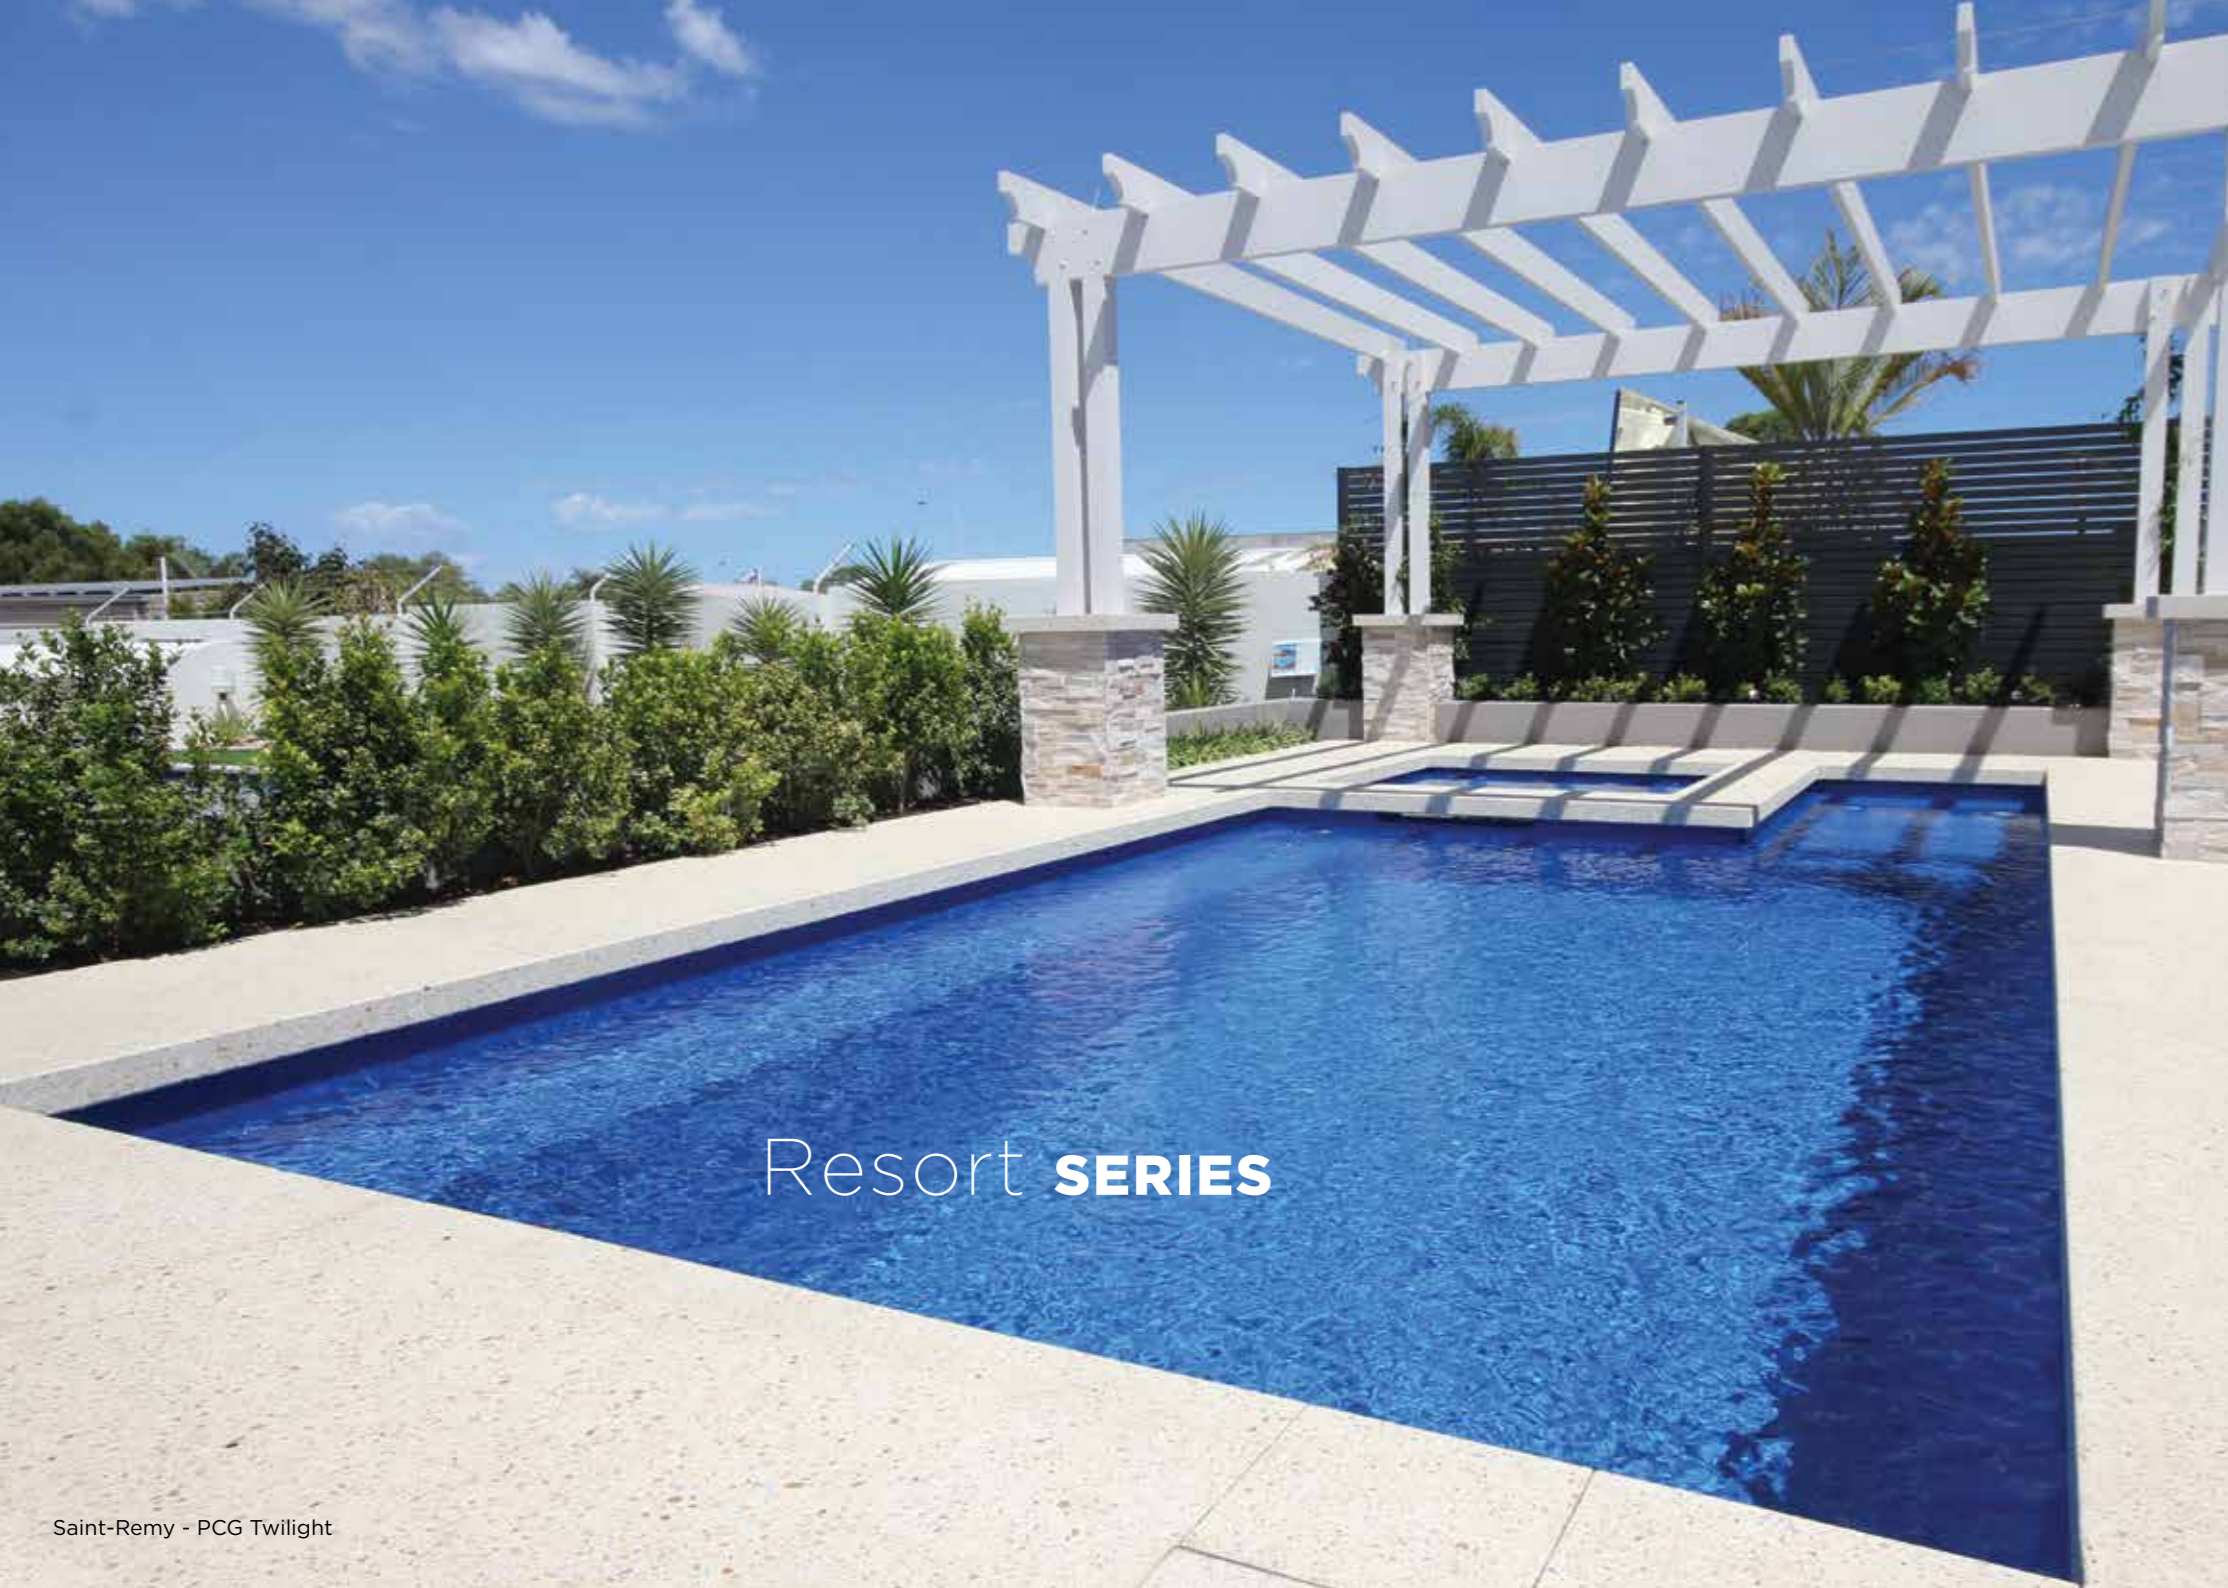

- A Graphene Nano-Tech pool has a higher resistance to water and moisture transpiration and chemical attack
- Increased laminate durability
- Improved corrosion barrier

Award Winning **DESIGNS**

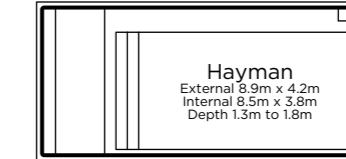

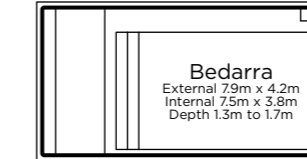

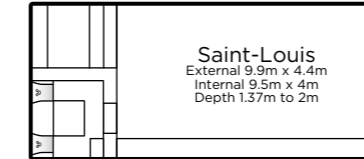

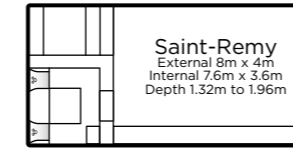

Aqua Technics is Australia's most awarded swimming pool company, having received numerous local, national and international Awards of Excellence. We have over 20 international awards - proof that the quality of our pools is recognised the world over.

Resort **SERIES**

Create your own backyard sanctuary and relax poolside on warm summer nights with these indulgent designs.

Bedarra - PCG Horizon

Saint-Remy & Saint-Louis Features

Wide entry step and large landing area with option to add air bubbles

2m x 1.86m and 980mm deep spa zone that can be heated separately from the pool

Cascading spillway between the spa and pool

450mm wide extended bench seat along one side of the pool

Bedarra & Hayman Features

Full-width beach entry area and wide entry steps

Extended bench seat down one side

Safety ledge around two sides, providing a rest point for kids*

Deep end entry and exit steps

*Children should be supervised at all times

Contemporary **SERIES**

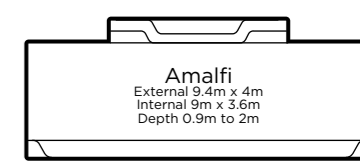

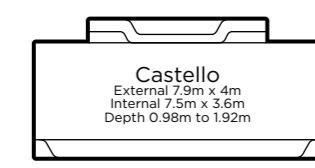

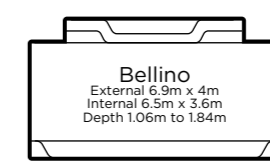

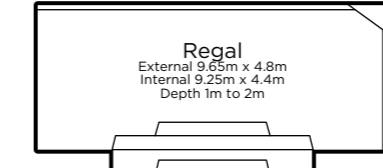

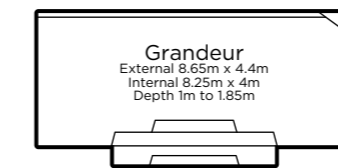

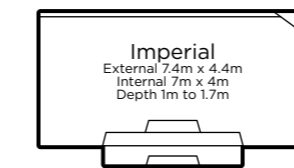

Amalfi - PCG Horizon

The Contemporary Series boasts sleek geometric lines with all the features of a modern pool design.

Contemporary Series Features

- Wide entry steps offering an entrance point to both the shallow and deep end
- Deep end corner swimout or steps, perfect for relaxation
- Safety ledge design, ideal for children learning to swim*
- Designed for entertaining, recreation and exercise

*Safety ledge not available on Bellino, Castello or Amalfi

The contemporary style of the Piazza Series will complement any outdoor area and not become dated in years to come.

Piazza Series Features

Wide seating ledge - running the length of the pool, perfect for taking a break and relaxing or splashing with the kids

Safety ledge on Westminster and Kensington - providing added safety and peace of mind for children learning to swim*

Alto and Latina - deep plunge style pools perfect for courtyards

Uninterrupted swimming area - end to end swimming in larger designs

Corner side entry steps for easy access into the shallow end

The Vogue Series features the very latest in geometric pool designs created specifically to suit small spaces.

Vogue Series Features

Slimline design perfect for narrow spaces

Unobtrusive side entry steps on both sides, allowing greater choice of pool position

Extended second entry step that can be used for seating

Vogue **SERIES**

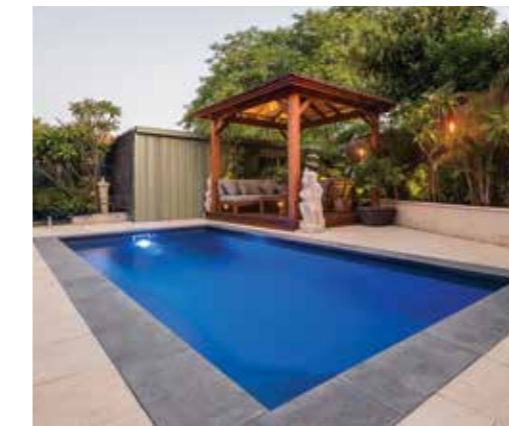

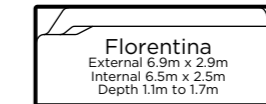

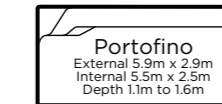

The Latin Series offers a slimline geometric design with generous relaxation zones, making it ideal for narrow or compact spaces.

Latin Series Features

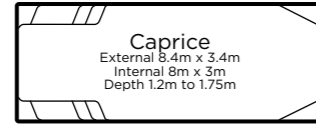

Contemporary geometric design

Unobtrusive corner entry steps

Extended bench seating

Portofino - PCG Horizon

Sleek and sophisticated, the Tuscan Series has been designed for narrow spaces without compromising on features and style

Tuscan Series Features

Generous side-entry step areas on both sides, allowing for greater choice of pool position

Twin deep end swimouts, perfect for relaxation

Ideal for swimming laps or family entertaining

Ultimo - PCG Twilight

Lap Pool Series Features

Twin side entry steps along one side

Safety ledge on both sides

Large, uninterrupted lap swimming area

Constant 1.4m depth

Sleek and stylish, the Lap Pool Series is perfect for serious lap swimmers or those who simply want more space to enjoy.

Lap Pool **SERIES**

Escape to paradise with the Villa Series and experience a luxurious hideaway in your own backyard with this stylish design.

Villa Series Features

Extra long entry steps in the shallow end for easy access

Wider second entry step creates the perfect spot to sit and relax

Paradiso and Sentosa feature slimline design
